Refrigerator

**SSM 9450** 

## **Operating instructions**

#### Please read this manual first!

Dear Customer,

We hope that your product, which has been produced in a 1st-class manufacturing facility and checked under the most meticulous quality control procedures, will provide you with years of good service.

For this, we recommend you to carefully read the entire manual of your product before using it and keep it at hand for future reference.

#### This manual

- Will help you use your appliance quickly and safely.
- Read the manual before installing and operating your product.
- Follow the instructions, especially those for safety.
- Keep the manual in an easily accessible place as you may need it later.
- Besides, read also the other documents provided with your product. Please note that this manual may be valid for other models as well.

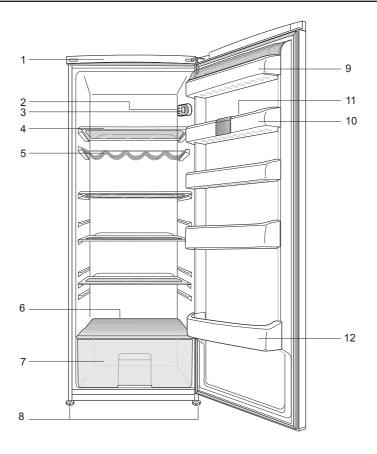

#### Symbols and their descriptions

This instruction manual contains the following symbols:

- Important information or useful usage tips.
- ⚠ Warning against dangerous conditions for life and property.
- A Warning against electric voltage.

### 1 Your cooler/freezer

- 1. Front plastic trim
- 2. Interior light
- 3. Thermostat knob
- 4. Movable shelves
- 5. Wine rack
- 6. Defrost water collection channel Drain 12. Bottle shelf tube

- 7. Crisper
- 8. Adjustable front feet
- 9. Dairy compartment
- 10. Adjustable door shelves
- 11. Egg compartment
- 1 Figures that take place in this instruction manual are schematic and may not correspond exactly with your product. If the subject parts are not included in the product you have purchased, then it is valid for other models.

## 2 Warnings

- DO NOT connect your appliance to the electricity supply until all packing and transit protectors have been removed.
- Leave to stand for at least 4 hours before switching on to allow compressor oil to settle if transported horizontally.
- If you are discarding an old refrigerator with a lock or latch fitted to the door, disable the lock/ latch, ensure that it is left in a safe condition to prevent the entrapment of young children.
- This appliance must only be used for its intended purpose i.e the storing of edible foodstuff.
- Do not dispose of the appliance on a fire.
   At **BLOMBERG**, the care and protection of our environment is an ongoing commitment.
   This appliance which is among the latest range introduced is particularly environment
- friendly. Your appliance contains non CFC / HFC natural substances in the cooling system (Called R600a) and in the insulation (Called cyclopentane) which are potentially flammable if exposed to fire. Therefore, take care not to damage, the cooling circuit / pipes of the appliance in transportation and in use. In case of damage do not expose the appliance to fire or potential ignition source and immediately ventilate the room where the appliance is situated.
- We suggest you contact your local authority for disposal information and facilities available.
- To obtain the best possible performance and trouble free operation from your appliance it is very important to carefully read these instructions.

- On delivery, check to make sure that the product is not damaged and that all the parts and accessories are in perfect condition.
- Ensure that the plug remains readily accessible. Do not use multiple adapter or extension cable.
- Failure to observe these instructions may invalidate your right to free service during the guarantee period.
- Keep ventilation openings, in the appliance enclosure or in the built-in structure, clear of obstruction.
- Do not use mechanical devices or other means to accelerate the defrosting process, other than those recommended by the manufacturer.
- Do not damage the refrigerant circuit.
- Do not use electrical appliances inside the food storage compartments of the

- appliance, unless they are of the type recommended by the manufacturer.
- We suggest you keep these instructions in a safe place for easy reference.
- This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved.
- Children should be supervised to ensure that they do not play with the appliance.

### **Electrical** Requirements

Before you insert the plug into the wall socket make sure that the voltage and the frequency shown on

the rating plate inside the appliance corresponds to your electricity supply.

Rating label is on the left hand side of inner liner.

We recommend that this appliance be connected to the mains supply via a suitable switched and fused socket. The appliance must be positioned so that the plug is accessible.

Should the mains lead of the appliance become damaged or should it need replacing at any time, it must be replaced by a special purpose made mains lead which can only be obtained from a **BLOMBERG** Authorised Service Agent.

### Warning! This Appliance Must Be Earthed

If the fitted moulded plug is not suitable for your socket, then the plug should be cut off and an appropriate plug fitted. Destroy the old plug which is cut off as a plug with

bared cord could cause a shock hazard if inserted into a socket elsewhere in the house.

The moulded plug on this appliance incorporates a 13 A fuse. Should the fuse need to be replaced an ASTABEAB approved BS 1362 fuse of the same rating must be used. Do not forget to refit the fuse cover. In the event of losing the fuse cover the plug must not be used until a replacement fuse has been fitted. Colour of the replacement fuse cover must be the same colour as that visible on the pin face of the plug. Fuse covers are available from any good electrical store.

## Important! Fitting A Different Plug

As the colours of the wires in the mains lead this appliance may not correspond with the coloured markings identifying the terminals in your plug proceed as follows: (See diagram).

1. Connect the green-

- yellow or green (Earth) wire to the terminal in the plug marked 'E' or with the symbol ⊕ or coloured green and yellow or green.
- Connect the blue (Neutral) wire to the terminal in the plug marked 'N' or coloured black.
- Connect the brown (Live) wire to the terminal in the plug marked 'L' or coloured red.
- 4. With alternative plugs a 13 A fuse must be fitted either in the plug or adaptor or in the main fuse box. If in doubt contact a qualified electrician.

## **Energy Saving Tips**

- Ensure your appliance is installed in a well ventilated area.
- 2. Ensure the time between buying chilled/ frozen food and placing them in your appliance is kept at minimum, particularly in summer. We recommend you use a cool bag or a special

- carrier bag to carry perishable food.
- 3. Do not leave the door (s) of your appliance open longer than necessary and ensure they are closed properly after each opening.
- 4. Defrost frozen food in the fridge, so that frozen food acts as an ice pack to assist cooling in fridge.

# Compliance with WEEE Directive and Disposing of the Waste Product:

Thisproduct complies with EU WEEE Directive (2012/19/EU). This product

classification bears symbol for waste electrical and electronic equipment (WEEE). This product has been manufactured with high quality parts materials which can reused and are suitable recycling. Do tor dispose of the waste product with normal domestic other and wastes at the end of its ΕN

/ I

service life. Take it to the collection center for the recycling of electrical and electronic equipment. Please consult your local authorities to learn about these collection centers.

## Compliance with RoHS Directive:

The product you have purchased complies with EU RoHS Directive (2011/65/EU). It does not contain harmful and prohibited materials specified in the Directive.

## Package information

Packaging materials of the product are manufactured from recyclable materials in accordance with our National Environment Regulations. Do not dispose of the packaging materials together with the domestic or other wastes. Take them to the packaging material collection points designated by the local authorities.

## 3 Installation

A In case the information which are given in the user manual are not taken into account, manufacturer will not assume any liability for this.

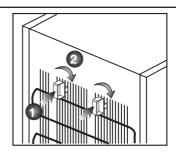

#### Points to be paid attention to when the relocation of the cooler/freezer

- 1. Your cooler/freezer should be unplugged.Before transportation of your cooler/freezer, it should be emptied and cleaned.
- 2. Before it is re-packaged, shelves, accessories, crisper, etc. inside vour cooler/freezer should be fixed with adhesive tape and secured against impacts. Package should be bound with a thick tape or sound ropes and the transportation rules on the package should be strictly observed.
- 3. Original packaging and foam materials should be kept for future transportations or moving.

#### Before you start the cooler/ freezer,

Check the following before you start to use your cooler/freezer:

- 1. Attach 2 plastic wedges as illustrated below. Plastic wedges are intended to keep the distance which will ensure the air circulation between vour cooler/freezer and the wall. (The picture is drawn up as a representation and it is not identical with your product.)
- 2. Clean the interior of the cooler/ freezer as recommended in the "Maintenance and cleaning" section.

- 3. Connect the plug of the cooler/ freezer to the wall socket. When the fridge door is opened, fridge internal lamp will turn on.
- **4.** When the compressor starts to operate, a sound will be heard. The liquid and gases sealed within the refrigeration system may also give rise to noise, even if the compressor is not running and this is guite normal.
- 5. Front edges of the cooler/freezer may feel warm. This is normal. These areas are designed to be warm to avoid condensation.

#### Electrical connection

Connect your product to a grounded socket which is being protected by a fuse with the appropriate capacity. Important:

The connection must be in compliance with national regulations.

- The power plug must be easily accessible after installation.
- Electrical safety of your cooler/freezer shall be guaranteed only if the earth system in your house complies with standards.

- The voltage stated on the label located at left inner side of your product should be equal to your network voltage.
- Extension cables and multi plugs must not be used for connection.
- A damaged power cable must be replaced by a qualified electrician.
- A Product must not be operated before it is repaired! There is the risk of electric shock!

#### Disposing of the packaging

The packing materials may be dangerous for children. Keep the packing materials out of the reach of children or dispose of them by classifying them in accordance with the waste instructions stated by your local authorities. Do not throw away with regular house waste, throw away on packaging pick up spots designated by the local authorities.

The packing of your cooler/freezer is produced from recyclable materials.

#### Disposing of your old cooler/ freezer

Dispose of your old cooler/freezer without giving any harm to the environment.

 You may consult your authorized dealer or waste collection center of your municipality about the disposal of your cooler/freezer.

Before disposing of your cooler/ freezer, cut out the electric plug and, if there are any locks on the door, make them inoperable in order to protect children against any danger.

#### **Placing and Installation**

⚠ If the entrance door of the room where the cooler/freezer will be installed is not wide enough for the cooler/freezer to pass through, then call the authorized service to have them remove the doors of your cooler/freezer and pass it sideways through the door.

- **1.** Install your cooler/freezer to a place that allows ease of use.
- 2. Keep your cooler/freezer away from heat sources, humid places and direct sunlight.
- 3. There must be appropriate air ventilation around your cooler/ freezer in order to achieve an efficient operation. If the cooler/freezer is to be placed in a recess in the wall, there must be at least 5 cm distance with the ceiling and at least 5 cm with the wall. Do not place your product on the materials such as rug or carpet.
- **4.** Place your cooler/freezer on an even floor surface to prevent jolts.

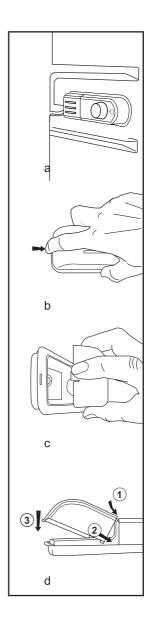

## Replacing the interior light bulb

Should the light fail to work switch off at the socket outlet and pull out the mains plug. Follow the below instructions to check if the light bulb has worked itself loose.

If the light still fails to work obtain a replacement E14 screw cap type 15 Watt (Max) bulb from your local electrical store and then fit it as follows:

- **1.** Switch off at the socket outlet and pull out the mains plug. You may find it useful to remove shelves for easy access.
- **2.** Remove the light diffuser cover as shown in figure (a-b).
  - 3. Replace the burnt-out light bulb.
- **4.** Reassemble the light diffuser cover as shown in figure (c). "Push firmly to ensure cover is fitted properly."
- **5.** Carefully dispose of the burnt-out light bulb immediately.

"Replacement light bulb can easily be obtained from a good local electrical or DIY store."

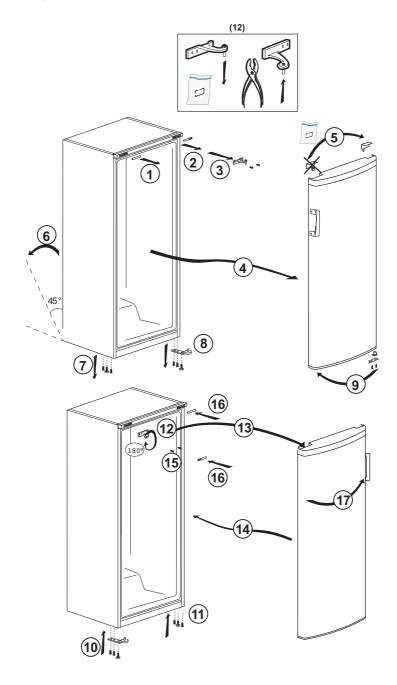

## 4 Preparation

- Your refrigerator should be installed at least 30 cm away from heat sources such as hobs, ovens, central heater and stoves and at least 5 cm away from electrical ovens and should not be located under direct sunlight.
- The ambient temperature of the room where you install your refrigerator should at least be 5°C. Operating your refrigerator under cooler conditions is not recommended with regard to its efficiency.
- Please make sure that the interior of your refrigerator is cleaned thoroughly.
- If two refrigerators are to be installed side by side, there should be at least 2 cm distance between them.
- When you operate your refrigerator for the first time, please observe the following instructions during the initial six hours.
- The door should not be opened frequently.
- It must be operated empty without any food in it.
- Do not unplug your refrigerator. If a power failure occurs out of your control, please see the warnings in the "Recommended solutions for the problems" section.
- Original packaging and foam materials should be kept for future transportations or moving.
- The baskets/drawers that are provided with the chill compartment must always be in use for low energy consumption and for better storage conditions.

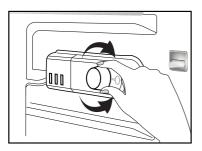

- Food contact with the temperature sensor in the freezer compartment may increase energy consumption of the appliance. Thus any contact with the sensor(s) must be avoided.
- In some models, the instrument panel automatically turns off 5 minutes after the door has closed. It will be reactivated when the door has opened or pressed on any key.
- Due to temperature change as a result of opening/closing the product door during operation, condensation on the door/body shelves and the glass containers is normal

## **Reversing the doors**

## 5 Using your cooler/freezer

### Setting the operating temperature

The operating temperature is regulated by the temperature control.

## 1 = Lowest cooling setting

(Warmest setting)

5 = Highest cooling setting (Coldest setting)

(Or)

#### Min. = Lowest cooling setting (Warmest setting)

Max. = Highest cooling setting (Coldest setting)

The average temperature inside the fridge should be around +5°C.

Please choose the setting according to the desired temperature.

You can stop operation of your device by adjusting the thermostat knob to "0" position.

Please note that there will be different temperatures in the cooling area.

The coldest region is immediately above the vegetable compartment.

The interior temperature also depends on ambient temperature, the frequency with which the door is opened and the amount of foods kept inside.

Frequently opening the door causes the interior temperature to rise.

For this reason, it is recommended to close the door again as soon as possible after use.

### Using interior compartments

Freezer compartment: Food that should be frozen and stored is placed in this compartment.

Body shelves: Distance between the shelves can be adjusted when necessary.

Crisper: Vegetables and fruits can be stored in this compartment for long periods without decaying.

Bottle shelf: Bottles, jars and tins can be placed in these shelves.

#### Cooling

#### Food storage

The fridge compartment is for the short-term storage of fresh food and drinks.

Store milk products in the intended compartment in the cooler/freezer.

Bottles can be stored in the bottle holder or in the bottle shelf of the door.

Raw meat is best kept in a polyethylene bag in the compartment at the very bottom of the cooler/freezer.

Allow hot foods and beverages to cool to room temperature prior to placing them in the cooler/freezer.

#### Attention

Store concentrated alcohol only standing upright and tightly closed.

#### Attention

Do not store explosive substances or containers with flammable propellant gases (canned cream, spray cans etc.) in the device. There is a danger of explosion.

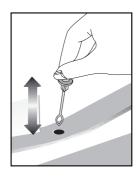

#### **Defrost**

The fridge compartment defrosts automatically. The thawing water flows through the drain channel into a collection container at the rear of the device.

During defrosting, water droplets form at the back of the fridge due to the evaporator.

If not all of the drops run down, they may freeze again after defrosting remove them with a cloth soaked in warm water, but never with a hard or sharp object.

Check the flow of the thawed water from time to time. It may become plugged occasionally.

## 6 Maintenance and cleaning

- A Never use gasoline, benzene or similar substances for cleaning purposes.
- A We recommend that you unplug the appliance before cleaning.
- Never use any sharp abrasive instrument, soap, household cleaner, detergent and wax polish for cleaning.
- Use lukewarm water to clean the cabinet of your cooler/freezer and wipe it dry.
- Use a damp cloth wrung out in a solution of one teaspoon of bicarbonate of soda to one pint of water to clean the interior and wipe it dry.
- ⚠ Make sure that no water enters the lamp housing and other electrical items.
- ⚠ If your cooler/freezer is not going to be used for a long period of time, unplug the power cable, remove all food, clean it and leave the door ajar.

- Check door seals regularly to ensure they are clean and free from food particles.
- ⚠ To remove door racks, remove all the contents and then simply push the door rack upwards from the base.
- ⚠ Never use cleaning agents or water that contain chlorine to clean the outer surfaces and chromium coated parts of the product. Chlorine causes corrosion on such metal surfaces.
- ⚠ Do not use sharp, abrasive tools, soap, household cleaning agents, detergents, kerosene, fuel oil, varnish etc. to prevent removal and deformation of the prints on the plastic part. Use lukewarm water and a soft cloth for cleaning and then wipe it dry.

## Protection of plastic surfaces

Do not put the liquid oils or oilcooked meals in your cooler/freezer in unsealed containers as they damage the plastic surfaces of your cooler/freezer. In case of spilling or smearing oil on the plastic surfaces, clean and rinse the relevant part of the surface at once with warm water.

## 7 Troubleshooting

Please review this list before calling the service. It will save your time and money. This list includes frequent complaints that are not arising from defective workmanship or material usage. Some of the features described here may not exist in your product.

#### The cooler/freezer does not operate.

- The plug is not inserted into the socket correctly. >>>Insert the plug into the socket securely.
- The fuse of the socket which your cooler/freezer is connected to or the main fuse have blown out. >>>Check the fuse.

## Condensation on the side wall of the fridge compartment (MULTIZONE, COOL CONTROL and FLEXI ZONE).

- Door has been opened frequently. >>>Do not open and close the door of cooler/freezer frequently.
- Ambient is very humid. >>>Do not install your cooler/freezer into highly humid places.
- Food containing liquid is stored in open containers. >>>Do not store food with liquid content in open containers.
- Door of the cooler/freezer is left ajar. >>>Close the door of the cooler/freezer.
- Thermostat is set to a very cold level. >>>Set the thermostat to a suitable level.

#### • Compressor is not running

- Protective thermic of the compressor will blow out during sudden power failures
  or plug-out plug-ins as the refrigerant pressure in the cooling system of the
  cooler/freezer has not been balanced yet. The cooler/freezer will start running
  approximately after 6 minutes. Please call the service if the cooler/freezer does
  not startup at the end of this period.
- The fridge is in defrost cycle. >>>This is normal for a full-automatically defrosting cooler/freezer. Defrosting cycle occurs periodically.
- The cooler/freezer is not plugged into the socket. >>>Make sure that the plug is fit into the socket.
- Temperature settings are not made correctly. >>>Select the suitable temperature value.
- There is a power outage. >>>Cooler/freezer returns to normal operation when the power restores.

#### The operation noise increases when the cooler/freezer is running.

• The operating performance of the cooler/freezer may change due to the changes in the ambient temperature. It is normal and not a fault.

#### The cooler/freezer is running frequently or for a long time.

- New product may be wider than the previous one. Larger cooler/freezers operate for a longer period of time.
- The room temperature may be high. >>>It is normal that the product operates for longer periods in hot ambient.
- The cooler/freezer might be plugged in recently or might be loaded with food.
   >>When the cooler/freezer is plugged in or loaded with food recently, it will take longer for it to attain the set temperature. This is normal.
- Large amounts of hot food might be put in the cooler/freezer recently. >>>Do not put hot food into the cooler/freezer.
- Doors might be opened frequently or left ajar for a long time. >>>The warm air that has entered into the cooler/freezer causes the cooler/freezer to run for longer periods. Do not open the doors frequently.
- Freezer or fridge compartment door might be left ajar. >>>Check if the doors are closed completely.
- The cooler/freezer is adjusted to a very low temperature. >>>Adjust the cooler/ freezer temperature to a warmer degree and wait until the temperature is achieved.
- Door seal of the fridge or freezer may be soiled, worn out, broken or not properly seated. >>>Clean or replace the seal. Damaged/broken seal causes the cooler/freezer to run for a longer period of time in order to maintain the current temperature.

#### Freezer temperature is very low while the fridge temperature is sufficient.

• The freezer temperature is adjusted to a very low value. >>>Adjust the freezer temperature to a warmer degree and check.

#### Fridge temperature is very low while the freezer temperature is sufficient.

• The fridge temperature is adjusted to a very low value. >>>Adjust the fridge temperature to a warmer degree and check.

#### Food kept in the fridge compartment drawers is frozen.

 The fridge temperature is adjusted to a very high value. >>>Adjust the fridge temperature to a lower value and check.

#### Temperature in the fridge or freezer is very high.

- The fridge temperature is adjusted to a very high value. >>>Fridge compartment temperature setting has an effect on the temperature of the freezer. Change the temperatures of the fridge or freezer and wait until the relevant compartments attain a sufficient temperature.
- Doors are opened frequently or left ajar for a long time. >>>Do not open the
  doors frequently.
- Door is ajar. >>>Close the door completely.
- The cooler/freezer is plugged in or loaded with food recently. >>>This is normal. When the cooler/freezer is plugged in or loaded with food recently, it will take longer for it to attain the set temperature.
- Large amounts of hot food might be put in the cooler/freezer recently. >>>Do not put hot food into the cooler/freezer.
- Vibrations or noise.
- The floor is not level or stable. >>> If the cooler/freezer rocks when moved slowly, balance it by adjusting its feet. Also make sure that the floor is strong enough to carry the cooler/freezer, and level.
- The items put onto the cooler/freezer may cause noise. >>>Remove the items on top of the cooler/freezer.

There are noises coming from the cooler/freezer like liquid flowing, spraying, etc.

 Liquid and gas flows occur in accordance with the operating principles of your cooler/freezer. It is normal and not a fault.

#### Whistle comes from the cooler/freezer.

• Fans are used in order to cool the cooler/freezer. It is normal and not a fault.

#### Condensation on the inner walls of cooler/freezer.

- Hot and humid weather increases icing and condensation. It is normal and not a fault.
- Doors are opened frequently or left ajar for a long time. >>>Do not open the
  doors frequently. Close them if they are open.
- Door is ajar. >>>Close the door completely.

Humidity occurs on the outside of the cooler/freezer or between the doors.

• There might be humidity in the air; this is quite normal in humid weather. When the humidity is less, condensation will disappear.

#### Bad odour inside the cooler/freezer.

- No regular cleaning is performed. >>>Clean the inside of the cooler/freezer regularly with a sponge, lukewarm water or carbonate dissolved in water.
- Some containers or package materials may cause the smell. >>>Use a different container or different brand packaging material.
- Food is put into the cooler/freezer in uncovered containers. >>>Keep the food
  in closed containers. Microorganisms spreading out from uncovered containers
  can cause unpleasant odours.
- Remove the foods that have expired best before dates and spoiled from the cooler/freezer.

#### The door is not closing.

- Food packages are preventing the door from closing. >>>Replace the packages that are obstructing the door.
- The cooler/freezer is not completely even on the floor. >>>Adjust the feet to balance the cooler/freezer.
- The floor is not level or strong. >>>Make sure that the floor is level and capable to carry the cooler/freezer.

#### Crispers are stuck.

• The food is touching the ceiling of the drawer. >>>Rearrange food in the drawer.

### 8 How To Obtain Service

Please keep your purchase receipt or other proof of purchase in a safe place; you will need to have it should the product require attention under guarantee.

You should also complete the details below; it will help us assist you when requesting service. (The model number is printed on the Instruction Booklet and the serial number is printed on the Rating Label affixed to the appliance)

Model No: Serial No: Retailer: Date of purchase:

## For service under guarantee simply telephone the appropriate number below

#### **UK Mainland & Northern Ireland**

Fridges & Freezers	0845 6046859
Electric Cookers	0845 6046859
Gas & Dual Fuel Cookers	0845 6046859
Washing Machines & Dishwashers	0845 6046859

#### Republic of Ireland

All Refrigeration, All Cookers	01 862 3411
Washing Machines & Dishwashers	

Before requesting service please check the trouble-shooting guide in the Operating Instructions as a charge may be levied where no fault is found even though your product may still be under guarantee.

### 9 Guarantee Details

Your new **BLOMBERG** product is guaranteed against the cost of breakdown repairs for three years from the date of the original purchase.

#### What is covered?

- Repairs necessary as a result of faulty materials, defective components or manufacturing defect.
- The cost of functional replacement parts, but excluding consumable items.
- The labour costs of a **BLOMBERG** approved repairer to carry out the repair.

#### What is not covered?

- Transit, delivery or accidental damage or misuse and abuse.
- Cabinet or appearance parts, including knobs, flaps, handles or container lids.
- Accessories or consumable items including but not limited to, ice trays, scrapers, cutlery baskets, filters and light bulbs.
- Repairs required as a result of unauthorised repair or inexpert installation that fails to meet the requirements contained in the user instruction book.
- Repairs to products used on commercial or non-residential household premises.
- Loss of frozen food in freezers or fridge/freezers. (Food loss insurance is often included within your household contents insurance policy, or may be available separately from your retailer).

#### Important notes.

- Your **BLOMBERG** product is designed and built for domestic household use only.
- The guarantee will be void if the product is installed or used in commercial or nonresidential domestic household premises.
- The product must be correctly installed, located and operated in accordance with the instructions contained in the User Instructions Booklet provided.
- Professional installation by a qualified Electrical Domestic Appliance Installer is recommended for all Washing Machines, Dishwashers and Electric Cookers
- Gas Cookers must only be installed by a Gas Safe (or BORD GAIS) registered Gas Installer.
- The guarantee is given only within the boundaries of the United Kingdom and the Republic of Ireland.
- The guarantee is applicable only to new products and is not transferable if the product is resold.

**BLOMBERG** disclaims any liability for incidental or consequential damages.

The guarantee does not in anyway diminish your statutory or legal rights.
